EINLADUNG ZUM VORTRAG

ROMAN FUNERARY MONUMENTS OF SOUTH-WESTERN PANNONIA IN THEIR MATERIAL, SOCIAL, AND RELIGIOUS CONTEXT

BRANKA MIGOTTI

Croatian Academy of Sciences and Arts, Zagreb

The project of the Croatian Science Foundation under the above title took place from the mid 2015 to the mid 2018. It covered three south-western Pannonian cities in north-western Croatia: colonia Siscia/Sisak, and municipia Andautonia/ Šćitarjevo and Aquae Balissae/Daruvar. The interdisciplinary research comprised archaeological and geological components of the evidence, aiming at its comprehensive study within the given frame. The main objectives were to discuss: 1. Territories of the cities; 2. Quantification of the monuments in terms of kinds and chronology; 3. Structural typology, iconography and epigraphy with the onomastics; 4. Social aspects of the monument use, with the stress on the differences between the military and civilians; 5. Ritual and religious aspects (incineration vs. inhumation, classical religion vs. Christianity); 6. Geo-archaeological aspect, focused on the use of the imported marble versus local stones, and on workshop origin of the monuments.

Im Anschluss bitten wir zu einem Glas Wein.
